Asia Pacific
2010

Hacker Halted Conference

- 08.00am Registration
09.00am Topic 1
Putting The Network Through the Test "Live"
Presenter: Sean Arries
- 10.00am Morning Refreshment (30 minutes)
10.30am Topic 2
Stratagem 1 "Deceiving the Heavens to Cross the Seas"
Presenter: Jayson E. Street
- 11.30am Topic 3
How I Can Take Down Your Network with Ease "Live"
Presenter: Wayne Burke
- 12.30pm Lunch Break (60 minutes)
01.30pm Topic 4
Web Application Hacking – The Untold "Live"
Presenter: Joseph McCray
- 02.30pm Topic 5
Cut The Crap, and Let Me Show You Why They Hack
Presenter: Haja Mohideen
- 03.30pm Afternoon Refreshment (30 minutes)
04.00pm Topic 6
Pen Testing A Virtualization System "Live"
Presenter: TBC
- 05.00pm Topic 7
How Can Botnets Make One A Millionaire?
Presenter: Gunter Ollman
- 06.00pm Break (Dinner not included)
07.00pm **Night Hack Live**
10.00pm End

**Serious threats.
Secure solutions.
Let's talk.**

Hacker Halted Asia Pacific 2010 Speakers

Sean Arries is the leader of Terremark's Threat Intelligence Team, an offensive intelligence division of Secure Information Services Group. The Team provides clients around the world with **rapid incident response, forensics, and other critical security services** including **evaluating security posture through vulnerability assessments and penetration testing**. With **12 years of experience** in the securities/technology field, He has led, as well as been a part of numerous consulting projects in the areas of **system, network, and web-based vulnerability assessment, security audits, computer forensics, and secure computing design**. He has also been instrumental in locating and responsibly **disclosing numerous harmful zero-day vulnerabilities**.

Jayson E. Street is an author and INFOSEC professional with a passion for Information Security. His consultation with the **FBI and Secret Service** on attempted network breaches resulted in the capture and successful prosecution of the criminals involved. In 2007 he consulted with the Secret Service on the **Wi-Fi security posture at the White House**. He has also spoken at conferences from Belgium to Brazil and at several other colleges and organizations on a variety of Information Security subjects. **Forbes** and **Scientific American** interviewed him regarding his research on **the issue of cyber-warfare** as it relates to China and their preparedness for an online war. On a humorous note he was chosen as **one of Time's persons** of the year for 2006.

Wayne Burke, Founder and CSO of Securit is a captain of a global operating group of penetration testers and security experts. Wayne and his group have delivered assignments and customized training for **Law Enforcement, Police, various Military Units, NSA, FBI, EPA and similar government bodies** from South America, Africa, Philippines, Singapore, Malaysia and numerous Gulf locations to name a few from around the world. Wayne completed his national service in Law Enforcement, which served as a platform to build his extensive expertise in the **security realm**. In EMEA, Americas and Asia he **works for numerous government agencies, corporate institutes and the military**. Wayne's **experience in IT Security spans across Penetration Testing aka Ethical Hacking, Digital Forensics and Wireless Technologies**. He has also **undertaken assignments for world renowned corporations** including Yahoo, Xerox, AT&T and Texas Instruments to name but a few. He is imminently qualified in his field in that he **holds a string of professional qualifications** in Networking to name a few (**MCT, MCSE, Cisco, Network+**) and IT Security (**CEH, ECSA /LPT, CHFI, MCSE+Security, CIW Security Analyst, Security+**) besides a **bachelor's degree in science**. He is also part of the **Expert Team of Master EC Council Certified Instructors**.

Joseph McCray has **10 years of experience in the security industry** with a diverse background that includes **network and web application penetration testing, incident response, and forensics** in both the DoD community and the private sector. Joe is also a frequent presenter at security conferences such as **Def Con, ToorCon, BruCON, TechnoSecurity, TechnoForensics**, and currently works as a **security consultant/trainer** both national and internationally with a focus on high security environments.

Haja Mohideen is the **Co-Founder and currently the Technical Director of EC-Council**. He **manages the certifications and training programs for EC-Council**. Mr Mohideen is well-known as the **creator of popular certification programs** such as the **CEH, CHFI, ECSA/LPT and ECSP**. With **more than 17 years of experience specializing in the development, support and project management of PC software and hardware** in distributed computing environment, he has **trained various Fortune 500 companies** as well as **US government agencies**.

Gunter Ollmann serves as **Vice President of Research at Damballa** and is responsible for evolving threat research and development. Ollmann has **over 20 years of experience within the information technology industry** and is a known veteran in the security space. Prior to joining Damballa, Ollmann held several strategic positions at **IBM Internet Security Systems (IBM ISS)** with the most recent being the **Chief Security Strategist**. In this role he was responsible for **predicting the evolution of future threats and helping guide IBM's overall security research and protection strategy**, as well as being the **key IBM spokesperson on evolving threats and mitigation techniques**. He also held the role of **Director of X-Force** as well as the **former head of X-Force security assessment services** for EMEA while at ISS (which was acquired by IBM in 2006). Prior to joining ISS, Ollmann was the professional services **director of Next Generation Security Software (NGS)**, a vulnerability research and attack-based consulting firm. Ollmann has been a contributor to multiple leading international IT and security focused magazines and journals, and has authored, developed and delivered a number of highly technical courses on **Web application security**. He is a well-known industry speaker worldwide and is often invited to present at various international security conferences. Ollmann is also highly regarded in the press as **an expert source on security threats** and is **a frequently quoted by the international media**.
